

FEATURED PROJECT

CONWAY
& OWEN

Featured Facts:

Project Location:

Atlanta, GA

Key Features:

Club Levels and Suites Renovation
Plumbing Studies
New Serving Kitchen
HVAC Air Distribution Modifications

Completion Date:

2007

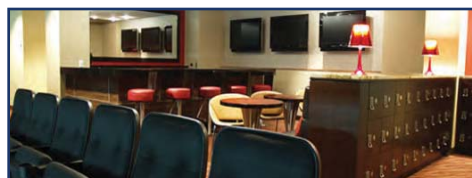

Estimated Cost:

\$30,000,000

Georgia Dome

Conway & Owen provided M/E/P design services for a \$30,000,000 renovation of the Georgia Dome's Club Level, Level A Suites, and Level B Suites. A new serving kitchen on Level B and underground grease traps for the entire east half of the Dome were also added. In addition, HVAC air distribution modifications to accommodate a new LED ribbon board, new lighting, and over 80 television monitors for the main and upper level concourses and concessions were part of the project.

The scope also included a plumbing study and design for replacement of the domestic water piping risers and the entire loop on the Club Level. Phase II of the project consisted of a plumbing study and design for replacement for the domestic water piping risers and entire loop on the Lower Level.

SPORTS AND RECREATION

Auburn University Indoor Football Practice Facility

Auburn, Alabama

Conway & Owen provided programming services for a new indoor football practice field. The facility is completely conditioned and includes a full 120-yard artificial turf football field, classrooms, training rooms, and support areas.

Auburn University Indoor Football Practice Facility

Auburn University Jordan-Hare Stadium

Auburn, Alabama

Multiple projects that included M/E/P design for the renovated areas and the addition of fire protection systems for all levels. Areas of work included the press box, media areas, concessions, luxury lounges, covered seating areas, club levels, and concourses.

Auburn University Plainsman Park Locker Room

Auburn, Alabama

Renovations to the home team locker room facility that included a new locker room with AV capabilities, a new player lounge and recreation area, a new hot/cold immersion therapy room, a new rainier room, and support/laundry areas.

Auburn University Soccer and Track Facility

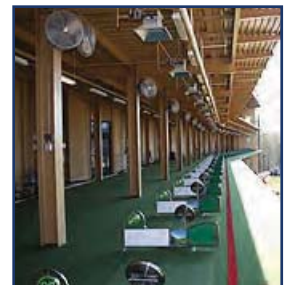

Auburn, Alabama

22,588 square feet of office support for the soccer and track teams and coaches. The design included offices, lockers, a training room, conference room, break room, elevator, and telecommunications. This project was designed for LEED Silver Certification.

Paragon Golf

Duluth, Georgia

A new multi-tiered golf range including outdoor lighting, an electrical ball retrieval/conveyor system, automatic tees, concessions, and an indoor food court.
